

## Terrestrial Salamander Monitoring Data Sheet *(Write legibly - in pencil!)*

Data collectors (Full names): \_\_\_\_\_

Site Name: \_\_\_\_\_

**WIND (circle one):** CALM (<1mph), LIGHT (1-3 mph, weather vane inactive),

Photo Taker: \_\_\_\_\_

LIGHT BREEZE (4-7 mph, dry leaves rustle, feel on face), GENTLE BREEZE (8-12 mph, leaves/small flags move),

Date (month/day/year): \_\_\_\_ / \_\_\_\_ / \_\_\_\_

MOD BREEZE (13-18 mph, moves thin branches, loose papers), BREEZY (>19mph, small trees sway = NO survey)

Air temp (°C): \_\_\_\_\_ Air temp (°F): \_\_\_\_\_

**SKY:** Few clouds, Partly cloudy, Cloudy/overcast, Fog/smoke, Light rain/drizzle, Snow, Heavy rain = NO survey

Current time (HR:MIN am, pm): \_\_\_\_\_

NCO Total minutes surveyed (Francl et al. 2010)\*: \_\_\_\_\_

\*Total min: EB = 15.7; QN = 54.0; QS = 70.2; FP = 54.0

NCO # survey teams: \_\_\_\_\_ NCO Survey time / team (min): \_\_\_\_\_

Cover Object Code (Obj-Site-#)	Cover Object Type CB = cover board, R = rock, LF = leaf litter, LG = down log	NCO size (S = much smaller than CB, M = similar to CB, L = much larger than CB)	NCO location (lower vs. upper SH or near vs far Pond)	Soil Surface Temp (°C)	Sub-soil Temp (°C)	Soil Moisture 1 = dry 2 = semi-moist 3 = moist	Species + Photo Taker initials  List all species under cover objects (Use <i>Codes</i> at bottom for other spp). Also list Photo Taker initials.	Snout-Vent Length (mm)	Total Length (mm)	Salamander Weight (g)		
										Sally + Bag	Bag	Sally wt

**Creature Codes:** A = ants, AC = ant colony, B = beetle, S = spider, R = roach, C = centipede, M = millipede, W = worm, Sn = Snail or slug, Cr = Cricket, RP = roly-poly, D = Daddy Long Legs, BL = beetle larvae
